

HTML & CSS Test I

Test Name: **create TODO list app UI using HTML and CSS**

Start time: 13th February, 10 AM

End time: 13th February, 12 PM

Problem statement

Create TODO list UI using HTML & CSS ONLY. Please don't use any JavaScript code for this. See the GIF down below to see the end solution.

Instructions

- Create complete UI as shown in the Picture below
- For creating UI:
 - Use icons from: Font-Awesome: <https://cdnjs.com/libraries/font-awesome>
 - Use font from: Bubblegum sans: <https://fonts.google.com/specimen/Bub...>
 - Make sure your UI has the same alignment as the following TODO list image has.
 - Use form tags for creating a text-areas.
 - Make sure to make it responsive for mobile devices, tablets and desktop.
- You are **NOT-ALLOWED** to style the UI the way you like. You are **ALLOWED** to google and read how to approach the UI.
- After completing your test please fill the form: <https://forms.gle/hurmq9VHBrzmn5QDA>.
- **Kindly note that** submissions after **12PM** will not be accepted.
- **DO NOT** copy and paste code from the internet.

DO NOT cheat with other students, there will be a plagiarism check and when found cheating, you won't be allowed to give future tests.
